Forecast for Thursday 19 Aug 2021

Weather: Many ranges will have a rather cloudy day. A few light showers are possible across Argyll and southern parts of Lochaber through the day.

Chance of cloud free mountain/hill tops above 800m: 30%

Visibility: Poor in extensive low cloud down to 600 to 800 metres for most of the day across much of the area, however some breaks likely across Arran, Jura and southern Kintyre by the afternoon.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Best chance of cloud free summits will be across the far south of the region in the afternoon, and perhaps far western areas of Argyll later. Feeling rather cold at height under cloud cover.

Forecast for Friday 20 Aug 2021

Weather: Mainly dry with a fair amount of cloud, perhaps an isolated light shower at first. Rain may spread from the southwest in the evening but low confidence in this aspect.

Maximum wind: Southerly 15 mph

Chance of cloud free mountain/hill tops above 800m: 80%

Visibility: Poor in low cloud down to 600 metres across the Trossachs at first, little in the way of low cloud elsewhere with good visibility. This will lift off the summits by early afternoon. However cloud may lower to 500 metres in evening rain later.

Temperature: **Glens:** Plus 8 rising to 18 Celsius
At 800m: Plus 10 Celsius
Freezing level: Above summits
